What the engraved mobile phone case is about

The engraved mobile phone case is different from the BB Décor, the engraved cases would be explained in the next paragraph. One of the benefit is the ability for your engraved image to be permanent, and the phone case to be taken off or put back onto your mobile at any time of yours or your client's choosing.

You send us a photo and our design team will create an engraved version on the mobile phone case that we would supply as seen in the iPhone image above. The special iPhone 4 / 4S mobile cases has two easy to install parts; the front which is a see through part of the case and will still give the user the ability for their screen to be touch-screen is flexible for usage, and then the back which the engraved image would go. Another benefit is that this product has space to also introduce Swarovski Crystals, or also if you choose to go for a cheaper option then sparkling rhinestones that are not Swarovski will do the sparkling trick but we will advise you if do request more information.

The pricing

As wholesale we understand that you would want to make a reasonable profit if you are reselling. We have managed to work out an excellent percentage mark for this service to you. The price compared to the online single orders could go down by about 60% per unit. The amount reduction in price will depend on your designs and quantity specification order. We will give you a customised quote in writing once we receive your enquiries.

*“Richard, just to let you know,
this is incredible and I think
you should promote this more
in churches.
You are doing well with your
inventions. The Jesus face is
so crystal clear.
‘really appreciate the case.’”*
